-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3738

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 67-72 and 74-81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin, US 5,575,817, in view of Martin, US 5,653,743. Martin '817 teaches a bifurcated graft having legs of different length. The extender 2 is apparently not configured to mate with the longer leg 4 after the body is placed in vasculature because it would block blood flow to one or more arteries. Martin '743 teaches extensions to maintain patency to the hypogastric artery and the external iliac artery and the leg below (abstract, lines 1-3). To incorporate elements similar to components 1 and 18 of Martin '743 into the Martin '817 assembly would have been obvious for patients for whom such reconstruction is necessary in view of the discussion at column 1, lines 24-50, of Martin '743, with further motivation having been provided by the similarities in design and purpose of the two inventions (Martin '817: column 1, lines 12-15 and 32-34; Martin '743: column 1, lines 6-9; column 4, lines 30-33).
